

ECCO 65AS

Ecco 65AS is the HVLV automatic gun designed for mounting on reciprocators or fixed positions. The paint needle has air operated opening and closing by spring action. The short reaction time ensures a perfect spraying result and low paint consumption. The needle seal is adjustable during operation. Simple and rigid mounting and service, requiring only standard tools. Precise alignment by a locating pin. Large paint supply control unit with exact setting in stepped positions. Stainless steel versions for abrasive or water borne paint

TECHNICAL DATA

Paint nozzle	0,6-2,7 mm
Air connection	Diam. 8 and 10mm
Air consumption	approx. 260 lit/min
Paint connection	G 3/8
Weight	828g
