

## ECCO 70AS

Ecco 70AS is the best gun for use with water or solvent borne materials on all types of robots or reciprocators. Ecco 70AS ensures a uniform spray pattern even after replacement of the air cap and fluid nozzle. Due to reduced internal pressure drop of atomizing and fan air, the Ecco 70AS can even stabilize the output parameters. Atomizing air and fan air are completely separated from the inlet to the air cap. Exterior surface are easy to clean and treated to ensure minimum dirt collection. Build in strainer for optimum quality.

### TECHNICAL DATA

Housing	Stainless steel
Cylinder	Aluminium / Tufram*
Paint nozzle	Stainless steel or Tungsten Carbide
Air cap	Aluminium or Tufram*
Needle	4mm Stainless steel or Tungsten Carbide
Sealings	Teflon/ Perfluor 128**
Weight	960 g

\*Treated by a unique process of hardening and reducing friction on aluminium.

\*\*Perfluor 128 is equal to Kalrez 4079.
